Re: Sacramento Regional Rally

Dear Ms. Clark:

I want to take this opportunity to share my sincerest appreciation with you and all of the PTSA members and parents at the School of Engineering and Sciences that supported the Sacramento Regional Rally on February 6-7, 2009.

The feedback from the event officials and appraisers was unanimous. Everyone enjoyed the well planned, quality meals on Friday evening and Saturday. They also appreciated the little extra touches like homemade deserts, linen table cloths, and attentive and friendly service. As one official put it, "I can't walk by that table without one of those people trying to feed me." All of the officials and appraisers felt well cared for and had their needs more than taken care of. As a direct result of your collective efforts, the officials and appraisers were able to focus their time and energy where needed. As you can imagine, well fed officials and appraisers are key to ensuring a successful event for all.

I also want to commend you for your resourcefulness in securing a donation to provide FREE breakfast and lunch for all event participants. In the twenty years I've volunteered for creative problem solving programs, like Construction Challenge, this was a first. The PTSA at the School of Engineering and Sciences has set a new standard in providing hospitality and food service for these types of events.

On behalf of the Association of Equipment Manufacturers, Destination Imagination, and the hundreds of people that directly benefitted from your collective efforts on Friday night and Saturday, congratulations on a job exceedingly well done.

Thank you for all that you are doing to support the students at the School of Engineering and Sciences and thank you for supporting Construction Challenge.

Sincerely,

Felicia M. Borges
